

## Guide on Federal and State Summer RVP Standards for Conventional Gasoline Only

This guide is intended for quick reference purposes only. Federal volatility regulations (40 CFR 80.27) apply to “designated volatility nonattainment areas” and to “designated volatility attainment areas,” as defined in 40 CFR 80.2(cc) and 80.2(dd), respectively. For this quick reference guide, we have listed RVP (Reid Vapor Pressure) limits by county, which may not coincide precisely with the borders of a nonattainment or attainment area. We have not listed RVP limits which may apply through voluntary agreements for supply of lower RVP fuel than what is otherwise required for an area. For a brief description of the federal fuel volatility regulations, see the last page of this guide. For specific information regarding borders, please consult your respective EPA regional office.

### Notes to Federal and State RVP Standards

- \* State has received a waiver under Clean Air Act 211(c)(4)(C) to adopt a fuel program, more stringent than federal requirements, into the federally-approved State Implementation Plan (SIP).
- \*\* Indicates there are counties or areas in counties in the state which have reformulated gasoline (RFG) requirements. See EPA's "List of Federal Reformulated Gasoline Program Areas" at [www.epa.gov/otaq/rfg/whereyoulive.htm](http://www.epa.gov/otaq/rfg/whereyoulive.htm). RFG areas must meet a VOC emissions performance reduction standard per 40 CFR 80.41.
- # Madison, Monroe, and St. Clair counties will be RFG covered areas with an effective date for retailers of July 1, 2007. However, the SIP requirement of 7.2 psi RVP is still in place until the State of Illinois takes action to remove this provision from the SIP.
- E State fuel program in federally-approved SIP does not provide for use of a 1.0 psi ethanol waiver under 80.27(d).
- **Atlanta area counties include:** Banks, Barrow, Bartow, Butts, Carroll, Chattooga, Cherokee, Clarke, Clayton, Cobb, Coweta, Dawson, DeKalb, Douglas, Fayette, Floyd, Forsyth, Fulton, Gordon, Gwinnett, Hall, Haralson, Heard, Henry, Jackson, Jasper, Jones, Lamar, Lumpkin, Madison, Meriwether, Monroe, Morgan, Newton, Oconee, Paulding, Pickens, Pike, Polk, Putnam, Rockdale, Spalding, Troup, Upson, and Walton.
  - **Eastern Texas Counties include:** Anderson, Angelina, Aransas, Atascosa, Austin, Bastrop, Bee, Bell, Bexar, Bosque, Bowie, Brazos, Burleson, Caldwell, Calhoun, Camp, Cass, Cherokee, Colorado, Comal, Cooke, Coryell, De Witt, Delta, Ellis, Falls, Fannin, Fayette, Franklin, Freestone, Goliad, Gonzales, Grayson, Gregg, Grimes, Guadalupe, Harrison, Hays, Henderson, Hill, Hood,

Hopkins, Houston, Hunt, Jackson, Jasper, Johnson, Karnes, Kaufman, Lamar, Lavaca, Lee, Leon, Limestone, Live Oak, Madison, Marion, Matagorda, McLennan, Milam, Morris, Nacogdoches, Navarro, Newton, Nueces, Panola, Parker, Polk, Rains, Red River, Refugio, Robertson, Rockwall, Rusk, Sabine, San Jacinto, San Patricio, San Augustine, Shelby, Smith, Somervell, Titus, Travis, Trinity, Tyler, Upshur, VanZandt, Victoria, Walker, Washington, Wharton, Williamson, Wilson, Wise, and Wood.

**Federal Fuel Volatility Regulations at 40 CFR 80.27:**

- For all regulated parties except retailers and wholesale purchaser-consumers, maximum standards generally take effect May 1.
- Standards for June 1 to September 15 are maximum standards for all regulated parties including retailers and wholesale purchaser-consumers, unless state has an extended summer season as part of the federally-approved SIP (e.g. Arizona, Eastern Texas).
- Gasoline alcohol blends meeting requirements of 80.27(d) have 1.0 psi waiver of applicable RVP standard unless the State has and enforces a SIP-approved RVP standard (e.g. Maine, Pennsylvania, Texas) or the State has received EPA approval to opt-out of the 1.0 psi waiver provision per Section 1501(c) of the Energy Policy Act of 2005 [Clean Air Act 211(h)(5), as amended].
- Alaska, Hawaii, and U. S. territories are exempted from federal volatility regulations.
